

**Collaborating Centre for Patient Safety  
International Steering Committee**

The International Steering Committee is charged with the following responsibilities:

- Assist in the creation of an international network that will facilitate the systematic identification, evaluation, and dissemination of patient safety solutions.
- Provide counsel on the setting of priorities for the development of patient safety solutions.
- Review, modify and approve proposed patient safety solutions.
- Assist in the understanding of potential barriers to the adoption of patient safety solutions in various countries and world regions.
- Devise strategies to facilitate adaptation of patient safety solutions where unique cultural or health care delivery characteristics exist.
